How Australia makes electricity 2025

Scroll for more!

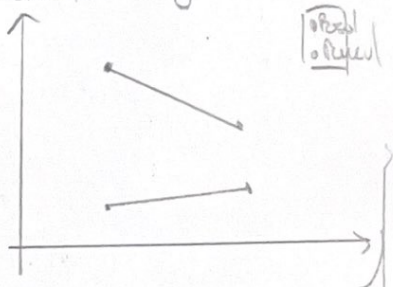

#1 The Big Picture

coal remains the largest power source

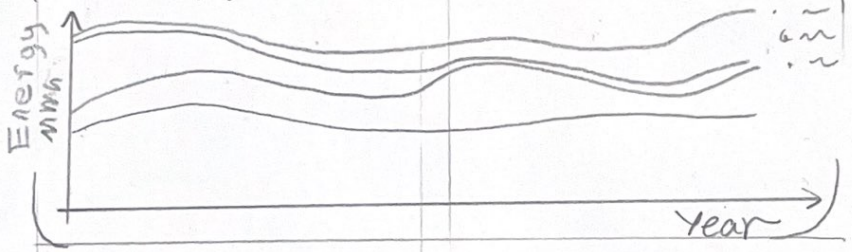

1 The mix, by source

2 Renewables grow

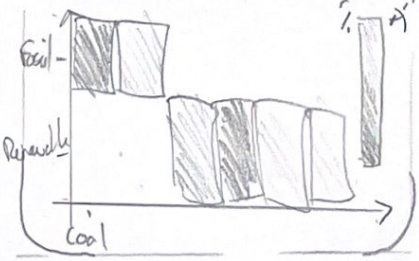

3 A decade of generation by source

Wind grew 21% in 2025 and supplies
'Australian Bureau of Statistics 2026'

4 Which sources clear 10%

Read the graph

30.5% is a share not a target

113.3 TwH Renewable

173.5 TwH Fossil

totals very diffe

#2 National Averages hide statewide mixes

the mix
